

# How long does an LP tank last?

## LP Grill tank usage

$$\begin{array}{r} 21,591 \text{ btu per pound} \\ \times 20 \text{ \# (for the tank)} \\ \hline 431,820 \text{ total} \end{array}$$

431,820 / 30,000 btu (total cooking on high for grill)  
total time 14.4 hours

@ 40,000 btu = 10.8 hours
